

WHY WE RALLY

#htxendorally2020
#bethechange

We rally to support the nearly 200 million people across the globe who suffer from endometriosis, a potentially debilitating yet often ignored chronic illness. We call for urgently needed changes in the way we diagnose and treat the disease. We need to **Rethink Endo**.

No one should go 10 years without a diagnosis. No one should undergo “treatment” that makes them worse. The current treatment of endo dismisses us, devalues us, and keeps us sick. We rally because bad care should not be the norm. We need to **Break the Cycle**.

Breaking this cycle starts not just with awareness but with truth. We rally to raise the profile of endometriosis and promote facts about the disease. We rally to encourage patients to take action against the inadequate standards of care. It is time to rethink endo. It is time our community rallies with us. Together, we can **Be The Change**.

RETHINK ENDO **BREAK THE CYCLE** **BE THE CHANGE**
